

## **Garmin GNS 430/530 Training Video**

The following is the link to a Garmin GNS 430/530 operations training video provided by Garmin on YouTube. The video uses a Garmin GNS 430/530 simulator application to illustrate the various functions, buttons and features of the 430/530. It provides a good overview of how to use the Garmin GNS 430/530 and is worth the time to view if you are not familiar with the unit.

Hodge Flight Services has the actual GNS 430/530 simulator application CD referenced during the training video for customers who are interested in more indepth training.

Please take the 30 minutes or so to review this training video.
